

Seattle Space Needle

PROJECT

Seattle Space Needle

Truck.

400 Broad Street

Seattle, WA

The following proposal is based on specific work on an aluminum bodied 1964 Grumman . The work performed on this particular food truck is specific to it's own unique needs and requirements. Each food truck or cart will have it's own set of challenges in terms of design and fabrication and will vary from the work performed here. Mobile food trucks and kitchens must be approved by both the local health departments in which they operate AND state LNI. Our truck meets the requirements set by both jurisdictions.
